Examiner

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The following changes have been made to the subject application:

In claim 1, line 7, after "grid", add --having an axis of symmetry--. The amendment provides an antecedent basis for "the axis of symmetry" recited in line 13.

The Examiner's amendment has been made in order to place the application in a condition for allowance.

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

The cited art of record fails to teach an integrated reflector and boom assembly comprising a series of stiff interlocking ribs defining a reflector section and boom section being contiguous to the reflector section and covering a smaller area than the reflector area wherein the ribs comprising a plurality of straight ribs extending in parallel in one piece from the reflector region into the boom region and are positioned symmetrical to an axis of symmetry, a plurality of angled ribs extending through the reflector portion wherein the straight ribs and angled ribs in the reflector section define triangular areas with combinations of all limitations as defined in respectively claims 1, 11 and 13. Therefore claims 1-17 are presently allowed.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
